2. It is my understanding that his efforts on these papers were often arduous, extending over a year's time. I believe you can be justly proud of his successfully completing the studies, pointing the way for others who follow. I also understand that his perseverance and thoroughness were complemented by a very cooperative, positive attitude. I commend him both for the fruits of his labor and the manner in which he performed. On behalf of the NIC, let me express my personal appreciation [] for his fine work.
